

# KEY INVESTOR INFORMATION

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Equity Income Feeder Fund, C Inc GBP, a fund within Equity Income Fund (Ireland) ICAV (ISIN:IE00BDD8DL32)

The Fund is managed by Link Fund Manager Solutions (Ireland) Limited.

### Objectives and Investment Policy

#### Objective

The fund is a feeder fund of LF Equity Income Fund (the 'Master Fund'), a fund within LF Investment Fund. The investment objective of the Master Fund is to provide a reasonable level of income together with capital growth.

#### Investment Policy

The fund will normally be fully invested in the Master Fund but may hold up to 15% in cash and other ancillary liquid assets. The Master Fund invests primarily in the shares of companies listed in the United Kingdom. It may also invest in unlisted companies, overseas entities, money market instruments, warrants, collective investment schemes and deposits. The Master Fund may also invest in derivatives, although it is not anticipated that this will have a significant impact on the risk profile of the fund.

Essential features of the fund:

- The fund invests in the Master Fund as described above with no need to adhere to a particular benchmark.
- The fund's investment returns are expected to be similar to those of the Master Fund, but may differ as a result of cash holdings, foreign exchange exposure or fund charges.
- You can buy and sell shares in the fund each business day.
- The fund aims to distribute available income every quarter.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money in the shorter term (e.g. less than 3-5 years)

### Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. As the fund has less than 5 years price history, this calculation incorporates the volatility of the equivalent Master Fund share class. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Smaller and Unlisted companies: The Master Fund invests in assets such as smaller companies which are both listed and unlisted companies. Such investments are often more difficult to sell and are more difficult to value. Their prices may also be subject to large short term swings (both up and down).
- Concentration Risk: The fund will invest all or substantially all of its assets in the shares of the Master Fund. However, the Master Fund will have a diversified portfolio of assets in accordance with its investment policy.
- Financial Techniques Impact: The fund invests in derivatives. Where derivatives are used for hedging, the risk of loss to the fund may be increased where the value of the derivative and the value of the security or position which it is hedging are insufficiently correlated.
- Currency Risk: As the Master Fund invests in non-base currency securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

## Charges for this fund

The charges you pay are used to pay the costs of running the fund including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the Sub-Fund over the year	
Ongoing Charges	51.75%
Charges taken from the Sub-Fund under certain specific conditions	
Performance Fee	None

The ongoing charge, as shown opposite, is based on expenses as at 31 December 2020. The fund invests in a share class of the Master Fund which does not impose an ongoing charge.

A dilution adjustment may be made which may increase or decrease the price you receive when you buy or sell shares in the fund.

For more information about charges, please see the relevant sections of the prospectus and supplement to the prospectus headed 'Fees and Expenses', each of which may be obtained free of charge from the address in 'Practical Information' below.

## Past Performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry and exit charges that may be paid on the purchase and sale of an investment.
- The ICAV and the Fund were established on 23 September 2016.
- Performance is calculated in GBP
